Test Results

Changes to Original Plan

Changes to the the RWT approach as outlined in the Plan, if any.

Summary	We abandoned the strategy of developing test tools.
Reason	As per its name, RWT is intended to go beyond internal testing to validate the process in actual use, as such, more test tools does not meet the spirit of the exercise.
Impact	none

Withdrawn Product

Products withdrawn during the past year that were outlined in the Plan, if any.

Summary of Testing Methods & Key Findings

A summary of the testing method used, challenges encountered and lessons learned, and non-conformities discovered, if any.

To give the RWT the best shot at success we obtained permission and cooperation from our largest clinic that operates 4 physical facilities, including mobile units, which recorded more than 125,000 patient visits in CY 2024, yet even with this relatively high number, our broadest reach, there were no API requests during the test period.

The challenge we face to adoption appears to be a combination factors, not the least of which is that our domain is community health, which is definitionally the least tech savvy combined with the fact that these are not end user features, there was simply no adoption in our domain at this time.
